THE NEW-YORK TRIBUNE

Is published every morning, at No. 30 And street. New York, and delivered to City Subscribers for NINE CENTS per week. Single copies Two Cents—Mail Subscribers, \$4 per annum, in advance, and the paper in no case continued beyond the time for which it is paid. Subscriptions taken for Six Months.

TT The WEEKLY TRIBUNE, a very large paper, for the Country, is published every Saturday morning, at the ow price of \$2 per annum, in advance.

THE TRIBUNE.

The " Proceedings of a Convention of the Friends of African Colonization, held in Washington City, May 4, 1842," has just been published. It embodies the Speeches before that Convention, either in full or in substance, of Messrs. R. R. Gurley, Dr. Hall, Hon. James T. Morehead of Ky., Hon. Wm. C. Rives of Va., Dr. Parker, Rev. Messrs. Bulfinch, Clark, Messrs. F. S. Key, Hon. C. F. Mercer, Hon. E. Whittlesey, and Hon. C. L. Ellsworth. It is a most interesting pamphlet, full of information and of interest .-We particularly direct the attention of the philanthropic to the long and able speech of Hon. Jas. T. MOREHEAD of Ky., embodying a History of the Origin, Progress, Objects and Effects of African Colonization.

IF HUNT'S MERCHANTS' MAGAZINE for this month contains original papers on the 'Commerce of Greece,' by F. STRONG, Consul at Athens; 'Progress of Population and Wealth in the United States,' by Prof. GEO. TUCKER, Va.; 'The Navy and its Use;' · Ireland-Its Resources and Commerce,' by EDWIN WILLIAMS; 'Commercial Voyages and Discoveries,' and 'The Morals of Trade,' by J. N. Bellows. These articles are all valuable, but the last two the most interesting to the general reader. These are followed by 15 pages of valuable Commercial Statistics, especially with reference to the Growth, Prices and Consumption of Grain in the United States and Great Britain respectively. (F. Hunt, 142 Fulton-street-Monthly: \$5 per annum.

Electioneering in Alabama. As one of the candidates in this county was

pursuing his regular business (electioneering,) the other day, he met with one of the hard-fisted yeamanry of the country (farmer) working away in the cetton field with the hoe. The candidate, as might be expected, let off of his horse and went into the feld, but the farmer, appearing to be rather busy, kept at his vocation-the candidate seeing that he did not wish to stop to talk, took up an idle hoe that happened to be near by, and commenced assisting the man in heeing. After hoeing some half an hour, the candidate commenced:

"How is the election going in this part of the

"Oh! pretty well, I believe," said the farmer. "Who do you think of supporting?"

"Why, I do n't know who yet." "Well, if you have not pledged yourself, I should

be glad if you would vote for me." "Very well, I'll do it. What office are you run-

ning for? Bet I must support Bridges for the Legislature, because I-" "Support Bridges!" exclaimed the astonished

candidate, dropping his hoe at the same time; "he is a condidate in Wilcox and not in Dallas."

"Well, I know that," said the farmer. "But I am a candidate in Dallas."

"Well, I can't help that," said the farmer, "I expect I would have voted for you if you had been in this county, because you are the first candidate that has hoed any for me in a long time.' "Well, I must be getting along; I wish you

good bye, sir."

Thus did our candidate get out of prison bounds, and before he knew it he had worked for one half hour, all the while the sweat boiling out of him at the rate of four knots an hour, and it will, no doubt in future, give him a lesson and a caution, that will teach him to find out in which county he gets to electioneer next time. [Cahawba (Ala.) Dem.

SAVANNAH INSOLVENTS .- We understand that there were upward of seventy applicants for the benefit of the Insolvent Law at the recent term of the Inferior Court in this city. This is a melancholy picture, but it goes to show that we are fast coming down to the alternative-work or starve. Throughout the South there are too many consumers and too few producers. The former, having used up their property, outlived their credit, and the good nature of their friends, must join the latter class, and then we may expect to see better times, and not before. We sever knew confidence between man and man at so low an ebb as it is ow in this community. | [Savannah Repub.

The August number of the American Laborer is now ready. It contains

Hon. HARMER DENNY'S REPORT ON AGRICUL-TURE to the Home Industry Convention; (original) A HISTORY OF THE POLICY OF OUR GOV-ERNMENT with REGARD TO REVENUE AND PROTECTION, by an eminent writer who has been many years in Congress, and in the President's Cabinet; (ori-pinal)

Extracts from the Messages of the Governor's of New-York—GEORGE CLINTON, DANIEL D. TOMPKINS, DEWITT CLINTON, ISAAC C. YATES, WILLIAM L. MARCY, &c. in favor of the Protection of American Industry, with the responses of successive Legislatures thereto. Also a variety of editorial and other matters.

The first No. was published in April. It will be completed in 12 Nos. Subscription price 75 cents, or twenty copies for \$10. The back numbers may still be procured. GREELEY & M'ELRATH.

I The Southern Literary Messenger .-The August No. of the valuable and very popular periodical has promptly made its appearance, and may be had at this office this morning. Persons about leaving the City and travelers passing through, will find this work both a useful and an entertaining companion. Price for single numbers 50 cents. Agents supplied on the usual terms,

The contents of the Angust No. are 1, Mrs. Latour-by Young Lady of Virginia. This is an admirable tale of Fashionable Life. 2. Journal of an American Naval Officer-3. Northern Rambles, 4. FOUR DOLLARS A YEAR.

WHOLE NO. 411.

SKETCH OF THE EDIFICE OF A LARGE ASSOCIATION

VIEWED FROM AN ELEVATION; Or Residence of an Association of 1800 to 2000 persons, united in interests, and prosecuting, combinedly, a great variety of branches of Agriculture, Manufactures, Mechanics, and the Arts and Sciences. It is destined to replace three hundred separate tenements or dwellings of the present system-composed of cabins, log-houses, cottages, city dwellings, or other constructions,

view and ground plan of the Edifice of an Association. To form a correct idea of the new Social Organization which we advocate, it is very important to understand the construction and arrangement of its Edifices; and as it is almost impossible to do so by descriptions in writing, we add two cuts. With the aid of them and the subjoined description, we hope that the reader will be able to obtain an idea of the architecture of Association; -we recommend the subject to a careful examina-

Before entering into the description, we will make a few remarks upon some details which we have explained before, but which we will sum up again very concisely. The proper number of persons for an Association is about 1800 (say 300 families) or allowing for the sick and absent, the number may be carried to 2,000. It is only in Associations of about 1,800 persons that all varieties of talents, capacities, tastes and characters can be united, which are necessary for a successful prosecution of all branches of Industry, Art, and Science.

A small Association can be established with 400 persons; this is the smallest number, however, with which the system of Groups and Series can be organized, and which is necessary to render Industry attractive. Quite small Associations of 200 persons, or 40 families, can be founded which would offer great advantages as regards 'comfort, economy and a judicious application of Labor and Capital, over the present system, but that organization could not be given to Industry which would communicate to it a zest, elegance and emulation, unprejudiced mind to answer.

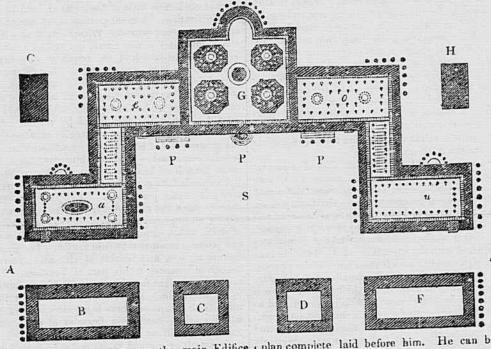

We give in our present article sketches of the front | necessary to render it pleasing and attractive.

For a large Association, 6,000 acres of land will be necessary; for a small one of 400 persons, 1,200 to 1,500 acres would be sufficient.

The first Association should be located near a large city, which would offer a convenient market for its lighter products, such as fruits, vegetables, poultry, &c. and from which tools, implements, machinery, and other objects can be obtained as

If we wish to picture to ourselves an Associa-

Ground Plan of the Edifiee of a large Association with the Out-houses.

and the store-houses, graneries, and other out-

S-Publin square, formed by the centre and wings of the Edifice. G-Gurden enclosed within the central range of

a, e, o, u-Court-yards between the different

ranges of buildings; they are from 90 to 100 feet wide, ornamented with trees and shrubbery, and crossed by corridors. P, P, P-Large portals or entrances to the Edi-

C-The Church.

H--A large Hall for musical representations and festivities.

B, C, D, F-Granaries, store-houses, and other out-buildings.

To avoid giving too great a length to the Edi fice, it must be composed of a double range or line of buildings, encircling the court-yards and garden-G. The dark line does not represent the foundation walls of the Edifice, but the entire width of a range of buildings; it is intended, together with the light dotted line around the inside, to be about 72 feet wide.

Around the inside of the Edifice will wind a spacious corridor or enclosed portico, which will communicate with all its parts-with its public saloons, halls, private apartments, work-shops, &c. The corridor is represented by the narrow light line which is placed inside of the broader

The ranges of buildings which enclose the garden, G, will be reserved for public purposes .-They will contain the Council-Rooms, Reading-Rooms, Library, Exchange, Public Halls, and

Saloons for parties. All noisy occupations will be carried on in the court-yard, U, would answer for the purpose .-The basement of the row of buildings around the court-yard, E or O, could be used for the kitchens. The wing which encircles the avenue, A, would contain the rooms devoted to visiters and trav-

The Edifice, as we see, is a Series, composed of Centre, Wings, and Sub-Wings. The Centre is the finest part of the Edifice, and must balance in effect and beauty the Wings and Sub-Wings.

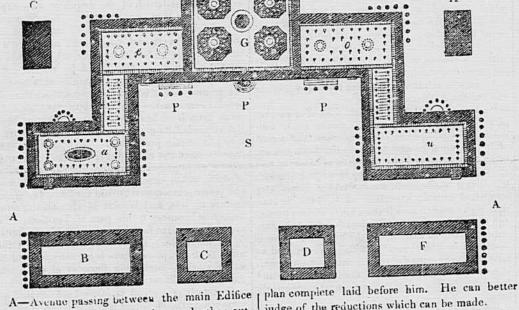

The Edifice of a small Association would be quite plain. A part of the large building might be erected and extended as the Association increased, or the range of buildings fronting on avenue A, and the public square. S, might be constructed, and the form of a large Edifice preserved.

The buildings should be of brick, and for the sake of economy, a brick-yard should be made on the Domain, or as near as possible, and the brick burnt near where the Edifice is to be built. The laborers engaged upon it might take part pay in the stock of the Association.

We will describe below the Edifice of a large Association. We are well aware that a small As- forms at present but one assemblage, without subsociation, with a very plain and economical building, will be first established; but the reader can sociation; there would not be, to choose the mode obtain a clearer idea of the subject by having the of eating as an example, one vast hall, where all account of the length of the present one.

tion established and in operation, we must imagine before us a fine domain beautifully and scientifically cultivated, laid out in gardens, fields, fruitorchards and wood-lands, and in the centre a fine and commodious Edifice, combining architectural beauty with convenience and economy. Fine flocks, teams and implements would meet the eye, and method and order would be combined with richness and variety; the charms of social life and the study of the Arts and Sciences would be united to the practical pursuits of Industry, and a higher order of intellectual Existence would be connected with productive, creative Labor. Would not such farms, the nine-tenths of which are miserably cultions, and the elevating influence of Art and Science banished from their existence? We leave the

an Association present a far more pleasing scene than the same number of persons divided into 300 families, living separately upon as many little tivated from want of knowledge and means, with solitary tenements, and poor teams and implements and the pleasures of extended social rela-

judge of the reductions which can be made. DESCRIPTION OF THE EDIFICE OF A LARGE ASSOCIATION.

The Edifice of an Association must differ very widely from the dwellings of our present Societies, which are suited only to isolated families, between whom very few social relations and no concert of action exist. Instead of the mass of separate little tenements which compose our towns and villages and cover our farms, and in which the greatest waste, inconvenience and for the most part deformity, vie with each other, an Association would build a large and regular Edifice. would be double those of our present houses. combining great elegance and comfort with great

The Edifices of Association will conform, to a certain extent, to one general plan, deduced from the wants of Man, and suited in every way to the domestic and social relations of a body of 1,800 persons, but the greatest variety in style and architecture will exist, according to the tastes of a People, climate and location.

The square and oblong forms should be avoided; they would be both heavy and monotonous. The Edifice should be composed of a centre, wings and sub-wings, and offer the greatest variety of form, and the finest combination of masses.;

To avoid giving too great an extension to the building, it should be three stories high, and rest upon a spacious basement. In the basement would be located the kitchens, store-rooms, a variety of workshops, &c.

The centre of the Edifice will be reserved for public purposes; it will contain the Dining-Halls, Council-Rooms, Library, Reading-Rooms, Lecture-Rooms, Exchange, and Saloons for social relations. An Association, however small, must have its Exchange, or Public Hall, where the members can meet to discuss public and private matters, conbasement of one of the extreme wings. The cert meetings of the Groups and Series, and transact a variety of business.

From the centre of the Eddice would rise a tower which would overlook the Domain, and which would communicate, by signals and other means, with all parts of it. A large and opulent Association would have its Observatory and chime of bells, which would be placed in this tower.

The Church would require to be a separate communicate with it by a covered corridor. The Manufactories and Work-shops, or in the

language of Association, the Halls of Industry, would be placed in one of the extreme wings. In a small Association they might be situated in a separate building, as the wings would not be distant enough from the centre to prevent the noise from incommoding the inhabitants. The Public Halls would be distinct in their ap-

propriations for different purposes; they would, with a few exceptions, consist of a number of contiguous saloons, so as to admit of subdivisions in all social unions, meetings, &c. A ball or banquet divisions: this confusion will not take place in As-

the members, old and young, would dine together on the contrary, a large Association would have nine Public Dining Rooms.

One for persons extremely advanced in age. Two for children.
Three for tables of the first or cheaper price.
Two for tables of the second or middle price.
One for tables of the third or higher price.

These different prices are established to suit different tastes and desires of economy; variety is a source of concord where there is full liberty to

In a small Ass a, three dining-halls would be sufficient; one for children and two for grown persons,-the latter at different prices; this derree of variety at least should be observed. Adjoining the public saloons, small dining-rooms would be reserved, where parties or groups can eat apart from the large tables. It will happen daily that parties of friends will wish to dine by themselves: they can do so in these rooms, where they will be served in the same manner and at the same price as at the large tables. It will be very little additional trouble to serve meals in them, and it will promote greatly freedom of choice. People can, if they wish, dine also in their private apartments by paying a small extra charge.

One of the most convenient and agreeable constructions of the Edifice of an Association will be a large corridor or inclosed portico, which will wind around one front of the building, and will form a covered communication leading to all its parts,to the public Halls, private Apartments and Work-

An Association may be compared to a town under one roof, and it must have a communication or avenue, corresponding to the street of a town, through which the inhabitants can go to the Halls, Saloons, Exchange, Reading-Rooms, Lecture-Rooms, and visit each other without having to encounter the wet and the cold, or having to go through dusty or muddy streets. Instead of an uncovered street, exposed to the hot sun in summer and to the inclemency of the weather in winter, and which is always either dusty or muddy, it would have a spacious corridor, or inclosed portico or piazza, of the kind described, which would encircle the centre and wings of one side of the entire building.

In a large Association the corridor would be about 24 feet wide in the centre of the Edifice, and 13 feet wide in the wings; in a small Association it would be from 12 to 15 feet wide. It would pass along the first story or on the top of the basement, and not upon the ground, as some openings for carringes must be left in the basement. The corridor would be inclosed within the outside walls of the Edifice, and the roof would project over it. It would be the hight of windows which lighted it, might be high and spacious like those of some churches. The doors of the public Halis and private Apartments would open upon it, as the oatside doors of our houses now open upon the street; flights of steps would lead from it to the upper stories. In a large and opulent Association, it is easy to conceive with what elegance its corridors could be fitted up, and what a convenience they would be to the inhabitants.

"To pass a winter's day," says Fourier, "in the Edifice of an Association,-to visit all parts of it without exposure to the inclemency of the weather,-to go to balls and parties in light dresses without being inconvenienced by the cold, without knowing whether it rained or stormed, would be a charm so new, that it would be alone sufficient to render our residences and cities detestable. If an Edifice, like that of an Association, were erected in our Societies and adapted to the usages of civilized life, the convenience alone of covered communications, warmed in winter and aired in summer, would give an immense value to it. Its rents, for the same quantity of space,

PRIVATE APARTMENTS. Part of the first and most of the second and third stories would be occupied by the private Apartments. They would vary greatly in size and price, to suit all tastes and inclinations-fortune and the desire of economy. The Apartments would be separated by division walls, so that no noise would be heard from one to the other. People could live by this means as isolatedly in an Association as they now can in cities, where the houses touch, and are only separated by walls. The entrance to them would be from the large Corridors or inclosed portico. A person would rent a suit of rooms in an Association as he now does a house, and could enjoy the privacy of domestic life without the cares of a household, to which would be added the charms of varied and congenial social relations. He could eat, as we have explained, in his own rooms or at the public

Will a Community of Property exist in Association, it will be asked? By no means; the lands, edifices, flocks, &c. will be appraised at a fair value, and represented by stock, divided into shares. A person will own stock in an Association, as he may now own stock in a railroad .-One quarter of the profits of the Association will go to pay the interest upon the stock. It is supposed by many that the product of an Association would be put into a common fund out of which the idle would receive as much as the active: this is a foolish mistake. A system for a just division of the profits of labor will be established, by which every person will receive the full value of what he SOCIAL CHARITY.

The Charity of Association will be as noble and generous as that of our societies is mean and stinting. The charity of Association will embrace particularly the two extremes of life: children building, on account of its size; it would be too will be supported by the social body,-receiving large to be incorporated in the Edifice, but would the best education that can be given them,-until an age when, by their own industry, they can support themselves. Persons advanced in age, and who may, from any cause, be poor, will also be supported by the Association, -not in the miserable manner that the poor now are, but in a way worthy of old age. Good apartments, the best of living, and the first places at festivals and celebrations will be allotted to them. The Charity of Association will be generous :- when it gives, it will give abundantly-nobly-richly; this is what the instinct of the human Soul requires. Our societies dole out a pitiful supply to the most urgent beggars: it is not charity, it is a reproach-2 dis-

The sick, and others unable to work, will, if they are not rich, be taken care of also by the As-

IFE and SPEECHES OF HENRY

LOLAY—MALLORY'S EDITION—Broadway
House, July 23d, 1342.—In general committee of the Democratic Whig Young Men of the city and county of New-York,

Resolved, That the publication proposed of the Life and
Speeches of Henry Clay by DANIEL MALLORY of New
York, undertaken with the consent and approbation of that
distinguished statesman, is condiaily recommended by this
Committee to the favor of their Democratic Whig brethren
throughout the Union. Extract from the minutes.

GILES M. HILLYER, Ass't Chairman,
SAMUEL D. JACKSON, Secretaries.

N. B. The above work will be published in two large

CHARLES. K. TAYLOR, Secretaries.

N. B. The above work will be published in two large octavo volumes of at least 600 pages each, bound in cloth extra, with embellishments: a likeness of Mr. Clay; a view of Ashland, his residence, and such other pictorial engravings as may be advisable to adorn the work. The price will be five dollars a copy, payable on delivery.

Agents authorized to obtain subscribers will be appointed in due season.

DANIEL MALLORY, 1928 Im

70 Wall-street.

BROWN'S BOWLING SALOON—
Masonic Hall, Breadway.—In introducing this establishment to the notice of gentlemen, the proprietor would ishment to the notice of gentlemen, the proprietor would call attention to it as possessing advantages superior to any thing ever yet produced in the world; and where can be found recreation unassociated with vulgarity or objectionable society. It has been the aim of the proprietor, in adapting this superb hall to the purposes of athletic exercise, to banish, by strict probitory regulations, all deviations from good propriety; to insure this, he has been careful in his selection of assistants, and particularly those charged with its general supervision.

selection of assistants, and particularly those charged with its general supervision.

To strangers visiting the city, and also citizens desirous of amusement and invigorating exercise during their absence from business, this Hall has attractions of a high order, inviting by the eelightful coolness consequent upon its size and perfect ventilation and the order and decorum prevailing, from strict discipline among its attendants.

N. B—In this Saleon will be found six alleys, thereby preventing the usual detention so much an objection, jy93m

PLENDID DISCOVERY for LEARNING TO PAINT AND DRAW FROM NATURE.
The works of learners executed according to this new style, may be seen at No. 231 Broadway, near the American Hotel, Mois, Victor Ernette will give lessons in this city until the 15th of next month, the time of his departure for France.—All those new discoveries to the number 19 six may be learned in six hours—for the low price of two dollars—for each new kind, payable after the lesson. Amateurs who have seen the works of the pupils are convinced that these are real discoveries useful to artists as well as for those who have never studied designing, for the rapidity and perfection with which drawings from nature may be made. The tion with which drawings from nature may be made. The excellence of the system it is impossible to explain: one iesson should be taken or a pupil should be seen at work fully to understand it. jyl4 lm*

CABINET FURNITURE.—Purchasers will find it to their interest to call at No. 20 Catherine-street, where may be found, on the second floor, an exten-sive assortment of splendid Cabinet Furniture, of the newest and most approved patterns, and which will be sold at prices below what furniture of the same quality can be bought for at auction. The advantage here offered in bay-ing of the regular manufactory at auction prices must be evident. If time and long experience in the business are any advantage in manufacturing good and ernamental ware, the subscriber feels confident in saving that any who may call at No. 20 Catherine-street and inche their selection shall have full and ample satisfaction, both as to price and quality, in the articles purchased. R. SWAYNE'S COMPOUND Syrup of Wild Cherry may be had at Milnor's 192 Broadway, corner of John street.

From the great satisfaction this medicine has given in Throat and Lung Dis-sacs, or a weakened constitution, especially when the nervous system is impaired, is claiming the attention of the medical profession in various sections of

the country, as well as in populous cities from the circumstance of its wonderful effects.

N B—An extract from the Weekly Messenger, published at Chambersburg, states that Dr. Humphrey, late of St. Thomas, in this country used Dr. Swavne's Syrup of Wild Cherry personally during a protracted illness, in preference to any other medicine he could obtain. DISEASED EYES AND INFLAM-weakness of the eye, or inflammation of the eye-lids, can be

mickly and safely removed, by the use of the ROMAN EYE BALSAM. Mrs. Davis, No. 77 Essex street, has been cured of inflammation of the eye lids and weak eyes, of years duration, by as ag only one jar of the Eye Balsam.

Miss Fitzgerald, No. 2 Market street, had for two or three years been so much afflicted with weak and inflamed eyes, that at times she could scarcely see to read. Her eyes have been completely restored by this Balm, after all other means had failed. Hundreds have by its nealing virtues been rehad failed. Hundreds have by its nealing virtues been re-stored to light, where almost total blindness, caused by ex-

cessive inflammation, had existed for years.

The "Roman Eye Balsam" has been a long time used in private practice by the most eminent occlists in this and foreign countries, and its astonishing efficacy in removing all disease and inflammation from the eye, has established for it a reputation far beyond the reach of any other preparation.

IN DIMNESS OF SIGHT, caused by fixed attention to their sight failing without any apparent disease. Put up in small jars with full directions for use. Price 374 certs. Prepared and sold wholesale and retail by DAVID SANDS & CO. 77 East Brondway, corner Market st. N. Y.
Sold also by A. B. & D. Sands, 79 and 100 Fulton street, and by A. B. Sands & Co. 273 Broadway, corner Chamber st.

CONSUMPTION.—Dr. ALLEN'S Bal-sam of Horehound, Liverwort and Pleurisy Root, for Coughs, Coids, Consumption and Liver Complaint. Consumption is a disease often secretly lurking in the sys-tem for years before there is the least complaint of the lungs. And in this stage it can be cured as effectually and

sesses very superior. I do strongly recommend it to the public and to the faculty. Respectfully.

Hudson, Aug. 1, 1841.

J. D. RICHARDSON, M. D.

Hudson, Aug. 1, 1841. J. D. RICHARDSON, M. D. WHOOPING COUCH.—This disease is prevailing very extensively, and is sweeping off many little ones with very few days' illness. Parents should remember that Dr. Alien's Balsam of Liverwort is the only infallible remedy, and has saved thousands of lives during seven years.

Sold by William A. Tyler, wholesale agent, 83 Barclay-treet and by E. M. Gnion, corner of Rovery and Grand street, and by E. M. Guion, corner of Bowery and Grand-

STATE OF NEW-YORK—In Chan-cery—Before the Vice Chancellor.

In pursuance of a decretal order of the Court of Chance-ry made by the Vice Chancellor of the First Circuit, will be sold at public auction under the direction of the subscriber, one of the Masters of this Court, by E. H. Ludlow, Anc-tioneer, at the Merchants' Exchange, in the City of New-Vork on the 17th day of August 1994, at 1994, of Clerk York, on the 17th day of August next, at twelve o'clock,

York, on the 17th day of August next, at trees of land situ-noon of that day:
All those four certain lots, pieces and parcels of land situ-ate lying and being in the (former twelfth now) Sixteenth Want of the City of New York, beginning at a point being the Westerly corner of the Fourth Avenue and Twenty-Seventh street, thence running Northwesterly along the Southwesterly line of Twenty Seventh street one hundred

Seventh street, thence running Northwesterly along the Southwesterly line of Twenty Seventh street one bundred feet, thence Southwesterly parallel with the Fourth Avenue ninety-eight feet nine inches, thence Southeasterly parallel with Twenty-seventh street one hundred feet to the North-westerly line of the Fourth Avenue, thence Northeasterly along the same nine-eight feet nine inches to the place of beginning.—Dated New-Yerk, July 25, 1842.

Jy25 tAni7 CEORGE CATLIN, Master in Chancery,

tem for years before there is the least complaint of the lungs. And in this stage it can be cured as effectually and as certainly as any other disease. Let no persons delay the use-of medicine until their lungs are sensibly affected, but in due season resort to Dr. Allen's Balsam of Liverwort. This medicine has proved even the "Conqueror of Physiciaus," for which all mankind will have abundant cause to b'ess the hand of Providence. More than 100 physicians in this city now use this medicine in their practice.

LIVER COMPLAINT CURED.—Dr. Alico—Dear Sir: I have used your Balsam of Horehound, Liverwort and Pleurisy Root in my practice for some months past, and from the wonderful effect it has had, I am fully satisfied that it possesses very superior virtues in the case of liver complaint and consumption. I do strongly recommend it to the pub-
